

# TREE JAWS TREE PULLER

Model No. TJ2100

## FEATURES

- Pull up to 5-inch diameter trees and brush with roots attached
- Removes wood or metal fence posts with ease
- Easily clean fence rows and overgrown pastures
- No stump left behind
- Minimal ground disturbance
- Low maintenance farm tool

## SPECIFICATIONS

- Weight: 450 pounds
- Hydraulic cylinder: 3-inch bore, 8-inch stroke
- Required hydraulic pressure: Minimum 1800 PSI to maximum 3500 PSI
- 10-inch opening at tip between hydraulic and fixed arms

Pricing includes universal skid steer mounting bracket, pin-on front end loader mounting bracket, or three-point tractor mount. The Tree Jaws can also be easily customized for other loader units as needed, cost not included.

Brush guard is optional, adding 70 pounds to unit.
